DergiPark author profile

Computer Engineering undergraduate at KSU building depth in **algorithms**, **software engineering**, and **applied machine learning** through coursework, labs, and team projects. Completed one-year **English preparatory** study; now **B2** English and **A1** Spanish. **Erasmus+** study in Poland and official **Erasmus+ internship** mobility acceptance in Bulgaria; **TEKNOFEST** national-team contributions; shipped work in **ML**, **web**, and **Android** with measurable metrics and public artifacts.

EDUCATION

B.Sc. Computer Engineering — Kahramanmaras Sutcu Imam University (KSU), Türkiye.
2022 — Present · Third-year undergraduate

Core areas: **data structures**, **OOP**, **databases**, **networks**, **operating systems**, **software engineering**, **architecture**, **AI/ML**, **web** — with laboratories and team project deliverables.

English preparatory program — one year, completed before the major; academic reading, writing, and speaking foundation.

LANGUAGES

Turkish — Native.
English — B2 (CEFR): written, spoken, and listening for coursework, documentation, and professional-style collaboration.
Spanish — A1 (beginner, active study).

EXPERIENCE & ACTIVITIES

Erasmus+ study mobility — Poland
Lodz University of Technology: English-medium courses, collaborative assignments, cross-cultural teamwork; adaptability in international academic settings.

Erasmus+ internship acceptance — Bulgaria
South-West University "Neofit Rilski", Blagoevgrad — official mobility acceptance on record; aligned with supervised engineering practice in the EU ecosystem.

TEKNOFEST — National
Contributor on two national applications: **International UAV** and **Unmanned Underwater Systems** — task breakdown, milestones, technical reporting, integration notes for judges.

INTERESTS

Chess · software development · machine learning · computer hardware · tennis · new languages — structured thinking, discipline, and continuous learning alongside engineering.

ENGINEERING PRACTICES

- **Discovery:** scope, constraints, measurable success criteria before implementation.
- **Traceability:** meaningful commits, concise design notes, review-ready handoffs.
- **Quality:** basic testing, accessibility and performance awareness; iterative delivery.

SCHOLARSHIP & VISIBILITY

ORCID and **DergiPark** for verified academic identity (Turkish open-access index + global lookup). Olive CV paper: full methodology *under review*; metrics and artifacts linked from portfolio.

CORE TECHNICAL SKILLS

FRONTEND
JavaScript (modular UI, state), semantic HTML/CSS, responsive layout, accessibility-minded components.

BACKEND & DATA
Python (data prep, experiments), SQL, metrics-oriented reporting, API-friendly access patterns.

MACHINE LEARNING
TensorFlow, PyTorch, transfer learning, fine-tuning, class imbalance, evaluation beyond accuracy-only headlines.

MOBILE & SYSTEMS
Kotlin (Android), Java, C++; Git with traceable commits and review-oriented workflow.

JavaScript · Python · SQL · Kotlin · TensorFlow · PyTorch · Git

Also: HTML5/CSS3, ES modules, REST/JSON, Markdown; static hosting, canonical URLs, index-friendly markup.

AT A GLANCE

- **Languages:** EN B2 · TR native · ES A1
- **Mobility:** Erasmus+ study (PL); internship mobility acceptance (BG)
- **Results:** 84.95% test acc. (2,694-image CV project)
- **Profiles:** ORCID · DergiPark · GitHub · Medium · live portfolio

COURSEWORK & LABS

DS · algorithms · OOP · DB · networks · OS · SE · architecture · AI/ML · web — labs, team projects, written reports.

SELECTED PROJECTS

Olive ripeness — EfficientNet-B0 — CV · ML
- 3-class field dataset (2,694 images); preprocessing, augmentation, class-weighted training; **84.95%** test accuracy; Green/Black **90%+**.
- P/R/F1, confusion matrix; transition-class analysis. Manuscript *under review*; PDF on portfolio.

ReK AI — browser assistant — JS · RAG-style
- Tokenization → retrieval → ranking → grounded answers; intent routing; no paid external LLM.
- Diagnostics-ready UI; on-device privacy; modular ES architecture.

Portfolio website — Live
- Mobile-first, progressive enhancement, keyboard/focus-safe UI; maintainable component structure.
- Static SEO-oriented deploy; GitHub, ORCID, DergiPark surfaced for one entry point.

Android application — Kotlin · WIP
- UI / Domain / Data; lifecycle-aware flows; reusable screen contracts.

Additional — Logic · R&D
- **Minesweeper-style:** deterministic state machine, edge-case-safe UI.
- **Physio × game:** sensor thresholding, event-driven integration (ongoing).

COLLABORATION & GOALS

Cross-cultural teamwork (Erasmus), English-medium study, competition deadlines. Comfortable with code review and written technical updates. Seeking **software engineering internships** and product-minded teams in ML, web, or Android — remote possible; relocation for the right role.

References on request. Metrics, mobility, and artifacts: **resulkilinc.com** · ORCID **0009-0006-8360-795X** · DergiPark.
